10	к	Analog	09	409.025000	409.025000								4	3	0	0	0	0	0	0

Channel have digital and analog, use issue any channel in excels, Please attention,

Red for digital, Green for analog. The content in the list is sample version, User can revise

any base on rule.Please read the rule before filling DMR configurate file.

1."id" can change to any words or empty

2."name" can change any name, max length is 8 bits including symbol or blank

3."Channel Type ",type "Digit" or "Analog"

4."Channel ", When Digital type "01" , Analog type "09"

5."TX RX"must be number, UHF"400MHZ-470MHZ" or "VHF"136-174MHZ", Must

including "." The format is 409.065000

6."POWER" accpet type"0"or"1", "0"for low power, "1"for high power

7."CC" is color code. number form "1-15" (don't accpet other number)

8."InboundSlot,OutboundSlot "number must be the same , "0" for 1 time slot , "1" for 2

time slot.

9."SQ" is squelch level, type "0-9" (can't accpet others number)

"10.""Contacttype"" means channel contact type,""1"" for private call, ""0"" for group

call (can't accept other data)

11. : ""Contactnumber"" means channel contact ID, Max is 16777215, Can't be empty.

12 : ""Contactname"" means channel contact name, It can't over 15bits"

13.CTCSS_TYPE:""0"", just need fill ""CTX ""and ""CRX"", type""0-50"" (can't accept

others number)

CTCSS_TYPE: ""1"", just need fill ""CDCSS_CTX"" and ""CDCSS_CRX

"",type""0-82""

CTCSS_TYPE: ""2"", just need fill ""CDCSS_RE_CTX ""and ""CDCSS_RE_CRX"",

type""0-82""

CTCSS_TYPE: ""3"", for close, all data about CTCSS type ""0""

Remark: Every CTCSS frequency are insteaded of a CTCSS No.

Please read the CTCSS type No list in second page"

CTCSS_TYPE	0	1	2
Type No.	CTCSS	CDCSS_CTX	CDCSS_RE_CTX
0	62.5 Hz	023N	0231
1	67.0 Hz	025N	0251
2	69.3 Hz	026N	0261
3	71.9 Hz	031N	031I
4	74.4 Hz	032N	032I
5	77.0 Hz	043N	043I
6	79.7 Hz	047N	0471
7	82.5 Hz	051N	051I
8	85.4 Hz	054N	054I
9	88.5 Hz	065N	065I

18	118.8Hz	131N	131I
19	123.0Hz	132N	132I
20 ▶ ► Sheet1 (197 SH7 CTCSS Type No. list +	13/N	19/IT

14. Please attention, all data must be valid in every line

Please attention:

- 1. Don't change the file name.
- 2. Please keep other line empty in this file.

1.2 Revise DMR contact list in excel 《CONTACTLIST.xls》

ID	name	number	contact_type	encryption	belonggroup	password
1	contact person 1	801	1	1	666	123456
2	contact person 2	802	1	1	666	
3	contact person 3	803	1	1	333	
4	contact person 4	804	1	1	333	
5	contact person 5	805	1	1	999;666	
6	contact person 6	806	1	1	999;333	
7	group 1	666	0	1		
8	group 2	333	0	1		
9	group 3	999	0	1		

Contact list is about the configurate of contact ID and group ID, after configurate

successfully, then set the local ID on terminal. the system will match all groups about local

ID automatic

1."ID" can type any words or empty

2."name" is contact name or group name. User can type any name, max length is 8 bits

including symbol or blank

- 3."number" just accept number,max 16777215
- 4."contact_type". the type of private call is "1",group talk is "0"
- 5."encryption"only accept type"1"
- 6."belonggroup", it is for the contact person belong which group.if it belong different

groups, please type the group's number in the "belonggroup", if different groups, please

use ";" separate them as sample version

7."password"will be instead of terminal default password. Original password:123456.

Password can accept Number and words, max 8 bits, and can't be empty.

Please attention:

- 3. Don't change the file name.
- 4. Please keep other line empty in this file.
- II. Copy channel list and contact list files into terminal root directory when connect with PC.

User can delete 《PTT_CHANNEL_LIST_DATA.xls》 and excel 《CONTACTLIST.xls》 after finished import into device.

2.1 Power on terminal, connect type C USB with PC, Open"my computer"choose S700 as

picture below.

▲ 硬盘 (4)			
本地磁盘 (C:)	本地磁盘 (D:)	本地磁盘 (E:)	本地磁盘 (F:)
